

# Complex Needs Classes

**There are three classes** in KTS Academy dedicated to meeting the needs of pupils with complex learning difficulties. Pupils in these classes follow a sensory based curriculum and benefit from high staffing levels.

**Classroom staff liaises** closely with families, Physiotherapists, Speech and Language Therapists, the Occupational Therapist and School Nurse to ensure that every pupil's needs are fully met in the classroom setting.

**Pupils may move** through these classes as they progress through school, or may transfer into one of the classes at any time during their school career if it is felt that they would benefit from a sensory based curriculum.

**Each pupil has an Individual Learning Programme** with targets specific to their needs and abilities, plus the opportunity to

take part in a wide range of class activities where the emphasis is on learning through enjoyment.

**Hydrotherapy and Rebound Therapy** sessions take place regularly and each child has access to the Light Stimulation Room and the newly refurbished Sensory Room.
