

KTS 3

We strive to develop and build upon skills and knowledge acquired within KTS2 and get students ready for the move to KTS+.

Our curriculum aims to:

Ensure all students are accessing a full curriculum that meets each student's individual needs. Develop life skills and independence to support transition to adulthood.

Accreditation

Students within KTS3 are gaining a range of qualifications through the work they are completing. ASDAN Personal Progress units are used for some students, throughout the curriculum. Other students are working towards gaining a Functional Skill in English, Maths or ICT.

Life Skills

All students have access to life skills lesson each week. This could involve learning about household tasks by accessing the KTS3 Kitchen or the flat and laundry at KTS+ or learning about self-help skills, keeping themselves safe and developing independence skills.

Sensory Provision and Therapies

Students may have a range of programmes or plans that they need to complete during the school day or week. This could be a Thrive plan, Sensory programme, SALT programme or physio. To support our students we have regular access to facilities and activities such as: hydrotherapy, rebound therapy, light room therapy and augmented communication. These sessions are accessible during the week and are planned into the individual's timetable.

Home/School provision a strong commitment to working together with families, through regular use of Home/School Books, regular contact via telephone and opportunities to discuss children's progress through visits to school.

Promoting life-long learning through quality of education, respect and equality for all.
